Information

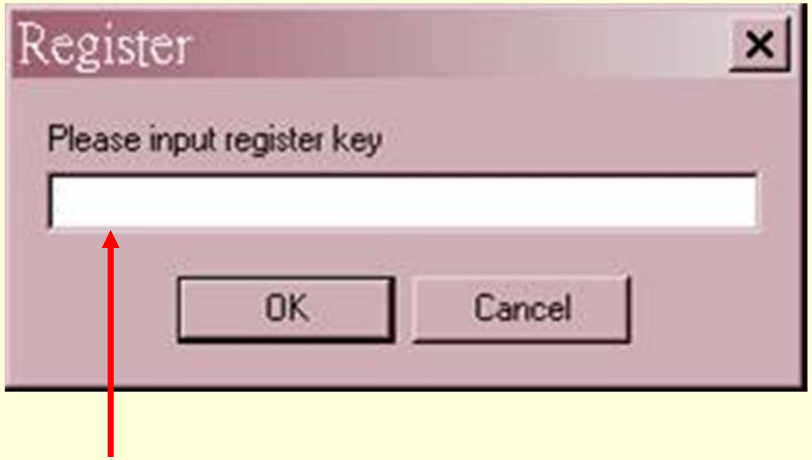
KOWA System has installed, The applicatoin will be started...

Please choice directory that will be install to

c:\kowaMA

Press “OK” to enter the system.

Under initial software install, please DO input the register key in this page. (Each unit will only have its own register key.)

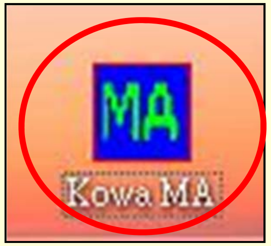


The register key (which is on the Kowa MA CD disc) covers a combination letters. After input the right register key, please just press "OK" to complete first install.

Please notice that one register key must to be combined with a private serial number of your machine as a set which we had stated clearly on the Kowa MA CD disc. In addition, the serial number of this machine is on the back side of its control box.

After then, please double click with the left mouse "Kowa MA" icon from the computer desk to execute the software every time.

Please notice that if you executes this software under Vista system computer, you must follow the pages 6~7 to set up few specific items before your first operation. Otherwise, it will not be possible to store the client's data.



Please notice that you might meet compatibility problem when you execute this software under some Windows OS computer. You must follow the steps to set up few specific items before your first operation. After you finished the whole set up process in advance, you are able to execute the software normally and no need to do these steps again.

Kowa MA Properties

If you have problems with this program and it worked correctly on an earlier version of Windows, select the compatibility mode that matches that earlier version.

Compatibility mode

☑ Run this program in compatibility mode for:

Windows XP (Service Pack 2)

Settings

☐ Run in 256 colors
☐ Run in 640 x 480 screen resolution
☐ Disable visual themes
☐ Disable desktop composition
☐ Disable display scaling on high DPI settings

Privilege Level

☑ Run this program as an administrator

Kindly entry the "*Compatibility*" path and select "Run this program in compatibility mode for: "Windows XP (Service Pack 2)". Also select "Privilege Level" as "Run this program as an administrator", then press "Apply" & "OK" to complete software system compatibility setting.
